

```
return len(password) >= 8
```

Task:

1. Document the function using docstring, inline comments, and Google style.
2. Compare documentation styles for security-related code.
3. Recommend the most appropriate style.

```
38 #2
39 #Standard Docstring
40 def check_strength(password):
41     """
42     Checks whether a password meets minimum length requirements.
43
44     Parameters:
45     password (str): The password to validate.
46
47     Returns:
48     bool: True if password length is at least 8 characters.
49     """
50     return len(password) >= 8
51 #Inline Comments
52 def check_strength(password):
53     # Check if password length is at least 8 characters
54     return len(password) >= 8
55 #Google Style
56 def check_strength(password):
57     """
```

ohta/Desktop/AI_AC_assignments/ass9_2346.py
Original String: Hello, World!

Problem 3: Math Utilities Module

Task:

1. Create a module math_utils.py with functions:
 - o square(n)
 - o cube(n)
 - o factorial(n)
2. Generate docstrings automatically using AI tools.
3. Export documentation as an HTML file

Problem 4: Attendance Management Module

Task:

- Create a module `attendance.py` with functions:
 - `mark_present(student)`
 - `mark_absent(student)`
 - `get_attendance(student)`
- Add proper docstrings.
- Generate and view documentation in terminal and browse

Problem 5: File Handling Function

Consider the function:

```
def read_file(filename):
```

```
    with open(filename, 'r') as f:
```

```
        return f.read()
```

Task:

1. Write documentation using all three formats.
2. Identify which style best explains exception handling.
3. Justify your recommendation.
